

. . . . McHenry County College Library Information Search & Retrieval—Databases

Library subscription databases are some of the best sources for quality information for college research projects. These databases contain location information and/or full-text articles from scholarly journals, newspapers, magazines, books, and more.

Access these databases from the library web page www.mchenry.edu/library. For articles from periodicals, click on **Article Databases**. For online reference sources, click on **Reference Databases**. When off-campus, you may still access most subscription databases by clicking on **Off Campus Access Menu** (under “DATABASES”). Students will use their MCC pc login of eight characters + their password (Staff/Faculty will use their username and password that they login with everyday).

For books, click on the **Library Catalog** or **NetLibrary**.

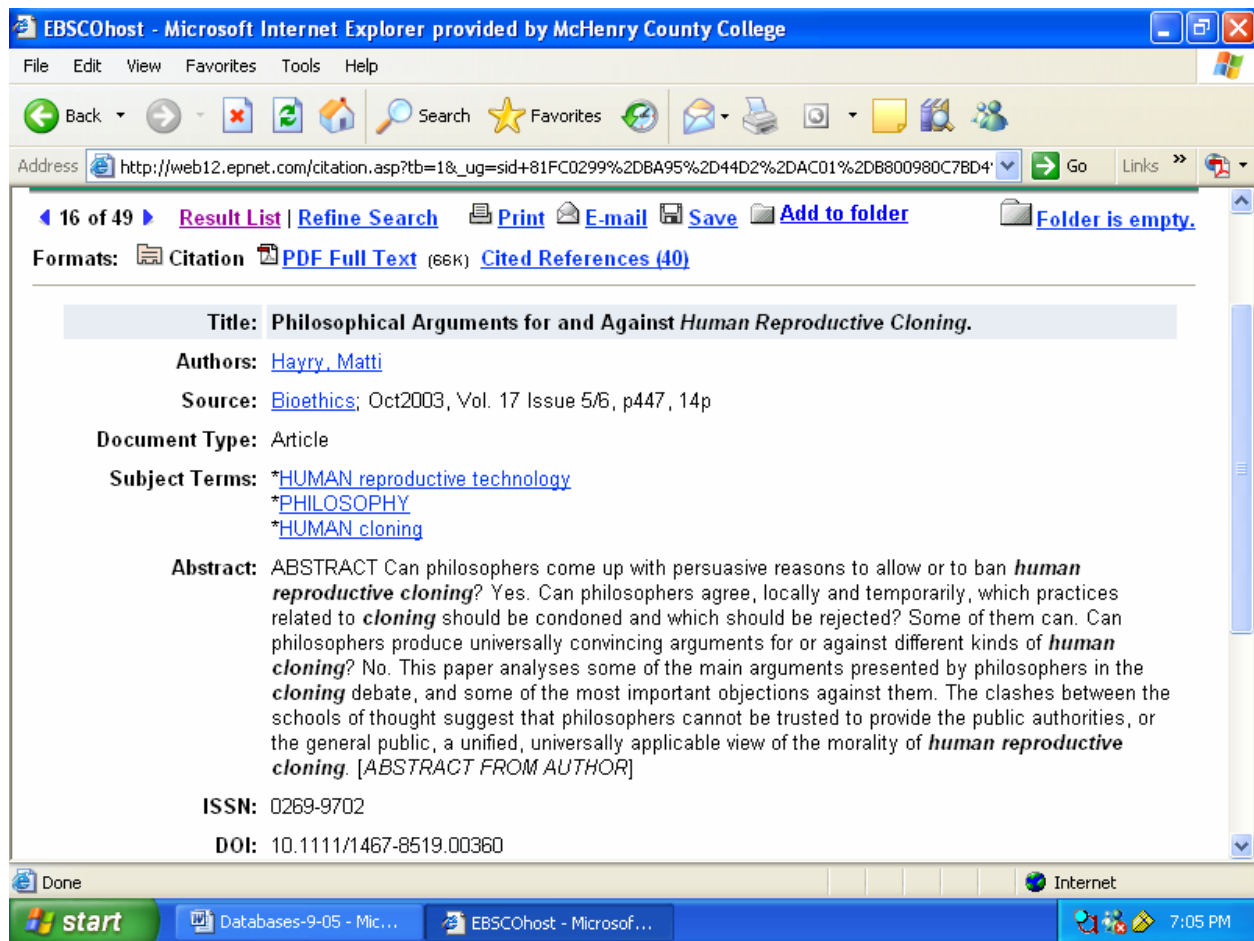

Searching Databases

When you access a database, you are presented with a search screen in which to type in your search terms. Below is a basic search in *EBSCO Academic Search Premier*, a periodical database:

The screenshot shows the EBSCO Academic Search Premier search interface. The browser title is "EBSCOhost - Microsoft Internet Explorer provided by McHenry County College". The address bar shows the URL: http://web12.epnet.com/search.asp?tb=1&_ug=sid+81FC0299%2DBA95%2D44D2%2DAC01%2DB800980C7BD4?. The search interface includes a navigation bar with "Basic Search", "Advanced Search", and "Choose Databases" buttons. Below this is a search bar with the text "human reproductive cloning" and "Search" and "Clear" buttons. A "Refine Search" section is visible with a "Limit your results:" box containing checkboxes for "Full Text" (checked), "References Available", and "Scholarly (Peer Reviewed) Journals". There are also dropdown menus for "Published Date" and "Yr.".

Note that in the above search, the **Full Text** box was checked, indicating that the searcher only wanted to find articles that were available in this database in full-text format

(meaning that the entire article is contained in the database, not just a citation). Here is a sample citation for an article resulting from the above search.

Reading Citations

The above is an article from a scholarly journal found in the *Academic Search Premier* database. Following the **title** and **author** of the article is the **source**, which is the title of the journal in which this article was published (*Bioethics*). Next to the source are the **publication date** and the **page number** on which this article can be found in the print edition of this journal (p447). The article is 14 pages in length (14p). The **abstract** is a brief summary of the article contents. To access the **full-text** of this article, you would click on the **PDF Full Text** link near the top of the screen.

The Library subscribes to approximately 25 databases giving access to periodicals in many different disciplines, and to approximately 27 reference databases. The library catalog lists all the books and media owned by the MCC Library; NetLibrary is a database of full-text books. The library collection is constantly evolving, so check our resources frequently for changes to database subscriptions and to our on-campus print and multimedia collection.

More help in accessing information from databases or with any research need can be obtained at the Library Reference Desk 815.455.8762.
