| Bid Title | CNC Press Brake  |
| Bid #     | RFP#03142025_03  |
| Question  | <p>We assume <del>XXXXXXX</del> should be including the cost of the machinery mover (rigger) to remove the press brake from the container on the delivery truck (at your dock) and transfer it to its' installation location?</p> <p>If so, we will need to know whether the dock entry to the building is ground level or not, the size of door it will go through, distance from the parking lot to machine installation location etc.</p> |
| Answer    | <p>Please include rigging. The door to the lab is 9'6" wide by 9'8" tall. It is a ground level door. There is a paved lane leading to the entrance, so the truck should be able to back within 20 ft of the door. From the door to the install position is approximately 40 ft. Inside clearance from the door to the install position is 130".</p>  |
| Question  | <p>Please describe no substitution accepted.<br/>Do you mean the bid forms?</p> <p>Should we offer an equal CNC Press Brake and a Laser Cutter?</p>  |
| Answer    | <p>The posting for these items' states "No Substitutions Accepted." For items that have that statement, it means that only bids for the specific brand, model, part number, and/or with the other requirements listed will be considered. We are not considering similar or equivalent products.</p>   |
